

Boyer

We are the sole Australia and New Zealand distributors for the classic Maison Boyer System that has been manufactured in Paris and virtually unchanged, since 1879. This system is used in public exhibition galleries all over Europe.

The Boyer system is very strong, simple to use and, particularly when displaying large pictures, really looks the part. One important advantage is that the hangers are rigid so that in most cases you can reposition your paintings while standing on the floor. The hooks are all self locking, i.e. just let go and they hold themselves in place, and they lend themselves very well to major or minor adjustment. The rail and hangers can be painted to match your walls.
