

Avanti (standard)

Picture Hanging Systems Pty Ltd

1300 88 36 45

info@picturehangingsystems.com.au

Product description

The rail which is available in white or clear anodised aluminium is only 23mm in height and is suited to blend in to a stylish minimal interior.

It's very easy to use and hides its fixings with specially designed screw-caps to give a discreet finish.

Applications

The Avanti system is an incredibly versatile picture hanging system, a gallery/home can be fitted out with the same rail in different positions, on a wall, on a ceiling or on top of a wall, even recessed into a wall or ceiling. This info page is specific to the 'standard' application (to a wall) and can be fixed up underneath a cornice or used as a stand-alone picture rail.

Features

Avanti (artshow)

The rail which is available in white or clear anodised aluminium is only 23mm in height and is suited to blend in to a stylish minimal interior.

It's very easy to use and hides its fixings with specially designed screw-caps to give a discreet finish.

Applications

The Avanti system is an incredibly versatile picture hanging system, a gallery/home can be fitted out with the same rail in different positions, on a wall, on a ceiling or on top of a wall, even recessed into a wall or ceiling. This info page is specific to the 'topfix' application (on to the face of or recessed into a ceiling). The rail can be fixed so the edge is touching the wall, this is especially handy in front of a glass/tiled or feature wall. The hangers simple twist and click into position where required.

Applications

The Avanti system is an incredibly versatile picture hanging system, a gallery/home can be fitted out with the same rail in different positions, on a wall, on a ceiling or on top of a wall, even recessed into a wall or ceiling. This info page is specific to the 'Avanti Barrel Clamp' accessory for use when tensioning the steel hangers by anchoring them to the floor. This is ideal for window displays, also allowing the user to hang pictures on both sides of the system.
